We are a fourth generation grower, processor and international trader and exporter of nuts and dried fruits, making us a vertically integrated company. We currently own and manage over 5,000 acres of Pistachio orchards in California, as well as, process and export the product we receive from other growers.

Primex International Trading Corporation was established in 1989 in Los Angeles, California. Our mission is to provide unbiased timely market information, reliable contracts, with the highest level of integrity, quality and service. Every year, Primex ships millions of pounds of products including pistachios, almonds, walnuts, hazelnuts, pecans, and dried fruits globally. We take pride in having an average of 15% growth annually over the past decade.

Our affiliate office, **Primex Trading GmbH**, was established in 1996 in Hamburg, Germany and in 2006, we opened a branch office in Italy. Here at Primex, we speak over 19 languages, which allow us to have an intimate connection globally, staying abreast of market conditions and trends.

In 2002, our pistachio processing facility, **Primex Farms** was built in San Joaquin Valley, California, with the newest modular and stream lined concepts in plant design, allowing ample room for expansion. It started operations at 15 million pounds and has expanded currently to process up to maximum of 60 million pounds. We were the first in the industry to incorporate an environmentally "green" concept of recycling solid and waste water, making it efficient, clean and environmentally friendly. In 2010, Primex Farms became the first pistachio processor to go Solar, generating 1.7 Megawatt annually covering 65% of our needs. In 2014, Primex Farms has implemented a new ERP inventory system.

We are committed to the highest standards in flavor, food safety and quality and have established an onsite HACCP program certification, attained USDA accreditation for Aflatoxin Analysis in Pistachios and Almonds and ISO 17025 alongside other quality control programs. We have an onsite independent laboratory providing service to other tree nut processing plants. In 2015, we were awarded with the 2014-2015 Pinnacle Club Plant of the Year by DFA of California, recognizing our commitment to food safety and overall excellence.
